ACSI-CS

MEMORANDUM FOR: ASSISTANT FOR COORDINATION, DIRECTOR OF CENTRAL INTELLIGENCE

SUBJECT: Scientific and Technical Intelligence, General (U)

1. References:

a. USIB-D-34.3/1 dated 30 October 1961

b. USIB-D-34.4/3 dated 6 August 1962

c. USIB-M-229, dated 15 August 1962 (Item 8)

d. Your memorandum, subject as above, dated 27 August 1962

2. The operation of the Department of the Army's scientific and technical collection and analysis responsibilities are being realigned in consonance with the reorganization of the Army. This realignment of responsibilities will result in better program management and control and should therefore provide expansion of certain programs without increased manpower or fiscal requirements. However, little time has elapsed since this reorganization; therefore experience to establish a basis for definitive fiscal and manpower requirements is inadequate. Consequently the specific comments concerning each recommendation which follow are therefore tentative.

3. The following comments are submitted as requested in paragraph 3 of your memorandum, dated 27 August 1962. These comments are keyed to the recommendation contained in paragraph 2 of Attachment B to USIB-D-34.4/3.

a. Par 2a. ACSI, DA does not have a machine translations project.

b. Par 2b. DIA is currently conducting a study to determine manpower and funding required to implement this recommendation. ACSI, DA has input which will be included in this study. Additional information is included in paragraph 4.

c. Par 2c. Same as b above.

d. Par 2d. ACSI, DA will participate as requested.

DOWNGRADED AT 12 YEAR INTERVALS
NOT AUTOMATICALLY DECLASSIFIED

Approved For Release 2006/03/15 : CIA-RDP77B00403R000100070013-6

e. Par 2e. Same as 2b above.

f. Par 2f. Same as 2d above.

g. Par 2g. No action contemplated until review is completed.

h. Par 2h. ACSI, DA plans for new technical collection methods will be submitted to the USIB for review when such action is deemed appropriate.

i. Par 2i. No action.

j. Par 2j. Same as d above.

k. Par 2k. Approval and implementation of the DIA scientific and technical intelligence plan will provide for the implementation of this recommendation.

l. Par 2l. Same as d above.

4. Additional in-house measures which ACSI, DA considers appropriate to improve scientific and technical intelligence collection and analysis are listed below. Actual implementation and extent of these measures are dependent upon completion of referenced study and DOD approval for additional manpower and fiscal support.

a. Reference recommendation 2b. Increased scientific and technical documents collection and translation capability.

b. Reference recommendation 2c. Although ACSI, DA currently contributes to and participates in this program increased participation would result in improved collection.

c. Reference paragraph 2e. Expansion of clandestine collection effort directed at scientific and technical intelligence collection through clandestine targeting and inducement would materially improve collection. The increased flow of defectors would also require increased manpower and fiscal support for exploitation.

5. The submission of the above information does not constitute ACSI, DA concurrence in USIB-D-34.4/3 dated 6 August 1962.

C. F. LEONARD, JR.
Major General, GS
Acting ACofS for Intelligence
